

December Specials Healthy Glowing Holiday Skin

Save 20% on Mineral Blends

Allow skin to breathe this summer ... Mineral Blends are great for humid climates and active lifestyles because they are water-resistant and perspiration-compatible. Loose mineral powders, as compared to pressed and liquid minerals, are the most gentle to skin, provide the best coverage, and last the longest.

They contain titanium dioxide and zinc oxide for natural broad-spectrum sunscreen protection. The minerals diffuse and refract light to minimize the appearance of lines and wrinkles.

Face Protectors

Face Protectors provide many coverage options from a light powder finish to an excellent spot camouflage or concealer to a full coverage foundation that still feels very light and natural. They can be applied dry or wet, with a sponge or a brush, blended with water or a moisturizer, all depending upon personal preference and amount of coverage desired. Minerals layer nicely. If you want more coverage, simply apply another layer.

Natural Blushers

Natural Blushers offer a full-strength color formula that makes it easier to get a desired look - from subtle to intense. They are concentrated so less is needed (and it lasts). Dot a little on the cheekbone and blend with sponge or brush; if more color is desired, then apply another layer. Tip: Blend colors together to create custom blush shades for your clients OR add Moisture Sealant to create a custom lip gloss.

Color Modifiers

Color Modifiers may be used to adjust base shade during skin healing for seasonal skin color changes. Can be used for custom blending or sold to the client for at-home shade adjustment.

Pearls & Blings

We have three specialty Pearl powder shades, each subtle and glimmer safe. In addition, we've added three Bling shades for more shimmer and shine. They can be sold separately or used in a custom blend.

Eye Enhancers

Eye Enhancers are a vibrant way to express mood and occasion. Our Eye Enhancers may be blended together to create "custom shades." They can be applied wet or dry and can be layered for a darker appearance. Many people who cannot wear traditional shadows have no problems with minerals.

Also, don't forget about purchasing the Mineral Blends "Go Healthy, Get the Glow!" t-shirt. It's a simple way to promote your Mineral Blends products without even saying a word!
