Skin Shape Up Thyme

Save 20% on Cleansers & Toners

Cleansing is the first step to achieving and maintaining healthy skin. Cleansing removes oily residue, dead skin cells, and waste by-products. Cleanse your face at least twice daily. Morning cleansing removes the overnight build-up of impurities, airborne particulates, and night treatment products, so your day treatment products can work effectively. Cleansing skin at night removes makeup, oils, bacteria, pollens, and pollutants. Our basic cleansers are color and fragrance-free.

Cream E Cleanser is a rich, satiny, white cream that is preferred by clients with normal to dry skin, although this cleanser may be used on all skin types. Ask about our designer options: Dreamy Cleanser & Champagne Cleanser.

Combo Cleanser is just that, a creamy lotion that foams up to give combination clients a really cool, clean feeling that leaves skin feeling soft and fresh. Botanicals include cranberry, cucumber, pumpkin, and papaya. The light green color is from chlorophyll. Ask about our designer options: Citrus Glow Cleanser & Comfort Cleanser.

Gel Cleanser is a pearlescent gel preferred by clients with normal to oily skin, although it may be used on all skin types. Contains allantoin, panthenol, cucumber, grapeseed, papaya, pineapple, & yucca extracts. Ask about our designer options: Laven Frank Cleanser & Metro Foam Cleanser.

Eye Cleanser will gently but efficiently dissolve makeup for easy removal from the eye area.

Toning is the second step to achieving & maintaining healthy skin. After cleansing, apply toners to ensure you've properly removed all the cleanser. Depending on the ingredients in the formula, toners may also rebalance, exfoliate, purify, or hydrate the skin. Moist skin is more receptive to topically applied products. This is the ideal time to apply an astringent toner for oily skin, a balancing toner for combination skin, or an emollient & soothing toner for dry &/or sensitive skin.

Hydrating Toner is loaded with hydrating & healing botanicals & powerful water-binding agents. It is alcohol free & appropriate for all skin types. Add some essential oils and spritz skin all day long to enjoy aromatherapy benefits. The green color is from chlorophyll. Ask about our designer options: Bliss Hydrating Mist, COOLcumber Toner & Hydrating Foamer.

Combo Toner is perfect for combination skin since it has mild cleansing agents & lots of water-binding agents, anti-irritants, & antioxidants to cleanse & protect skin. Also contains allantoin, chamomile, cherry bark, cranberry, cucumber, elderberry, ginkgo, green tea, papaya, & willow bark. Ask about our designer options: Comforting Mist & SPAberry Toner.

Purifying Toner is antiseptic; the salicylic acid penetrates into the follicle to dissolve & wash away excess oil. To combat the drying effects, we have added 5 hydrators: aloe vera, glycerin, sorbitol, sodium PCA, and allantoin. Ask about our designer options: Clean and Breezie Toner & Tropical Toner.
