

Spring Clean *Your Skin*

with Enzymes, Scrubs, Beads & Acids

Acids Remove Dead, Dull, Dry Skin

Alpha Beta X, pH 3.4 - Our formula is perfect for all skin types to use every night after cleansing and toning and before any specialty products, hydrating gels, and/or moisturizers. It has 6% lactic, 3% glycolic and 1% salicylic acid in a luxurious feeling base that makes it a treat to apply.

Glycolic Peeling Blend, 30%, pH 3.0 - The smallest alpha hydroxyacid (AHA) and has the greatest penetration potential. It dissolves the cellular cement responsible for holding the excess dead skin cells on the surface of the skin thereby facilitating their sloughing off.

Lactic Peeling Blend, 30% - pH 3.0 - Found in the blood and muscle tissues and the skin's natural moisturizing factor so it is less irritating than glycolic and more appropriate for aging, dry and sensitive skin, as well as people with darker skin color.

Salicylic Peel, 20% - Derived from aspirin. Aspirin has anti-inflammatory properties, and salicylic acid retains many of these anti-inflammatory properties so it does not leave the skin as irritated AHAs. Penetrates into the pores which contains sebum and exfoliates the dead skin cells that are built up inside pores. Therefore, BHAs work better for oily and acne skin, although dry skin can benefit from the deep pore exfoliation process as well. Even though it is only 20%, it is our most aggressive peel.

Manual Microdermabrasion

Microdermabrasion Crystals have sharp edges that abrade the skin; exercise caution when using the crystals as they are powerful. Options: Exfoliating Beads - Micro, Exfoliating Beads - Regular, and Microdermabrasion Crystals.

Scrubs Exfoliate Skin & Encourages New Cell Growth

Combo Scrub is a stimulating cleansing scrub that will give skin a healthy glow. It helps remove dead skin cells, oils, and other waste products from the skin so it can function more efficiently. Contains natural exfoliating particles. Designer Options: Spicy Pumpkin Scrub & Mintie Scrub.

Gel Scrub has perfectly spherical polyethylene beads suspended in a pearlescent gel base that will foam up while gently exfoliating normal to oily skin. Designer Options: Margarita Scrub & Tropical Scrubber.

Milky Scrub is a nice white lotion with micro polyethylene beads to gently exfoliate without abrading the skin. Dry skins love this scrub. Leaves skin silky smooth, and extra nourishing lipids to leave skin moisturized. Designer Options: Oh Baby Scrubbing Lotion & Stimulating Scrubbing Lotion.

Enzymes - A "Must" for Every Standard/European Facial

Combined Enzyme Powder - Our combined enzyme powder also contains antioxidants, anti-inflammatories, and soothing ingredients to begin working at the same time exfoliation is taking place. Experience a gentle but extremely effective exfoliation.

Enzyme Activator/Massage Gel - Forms a thicker, more occlusive barrier to keep the enzymes close to the skin for maximum results.
